■ PROFILE

Data Analyst with **10+ years** designing reporting infrastructure and dashboards that drive executive decisions. Proven experience across **hospitality, automotive, fleet logistics, distribution and education**, turning raw data into KPIs the C-suite relies on daily. Specialized in **Power BI, Microsoft Fabric, DAX, SQL and Power BI Embedded**; Packt-published author and technical content creator on YouTube since 2019. My goal is to keep building high-impact solutions that maximize results through efficient use of resources.

■ EXPERIENCE

Data Analyst

Dec 2024 — Present · Remote

Proxify / *European senior talent network*

- ▶ **Accenga** *risk-management SaaS for fleets and insurers*
- **Designed and built from scratch** the data and reporting infrastructure for claims analysis.
- Deployed **Microsoft Fabric** as the centralized analytics platform for the entire operation.
- Developed paginated and interactive reports for operational and executive analysis.
- Established data quality and consistency controls to support risk decisions.
- ▶ **Complete CO — Automation** *automotive industrial engineering, turnkey solutions*
- Built dynamic Power BI dashboards to track shop-floor project progress.
- Integrated data from **Autodesk Construction Cloud** and modeled a unified schema for project analytics.
- Centralized project analytics in Microsoft Fabric with clean, actionable models.
- Built Power BI dashboards with dynamic Gantt charts grouped by labor resource (Engineering, Manufacturing, Installation, Documentation) to ease schedule visualization across projects.
- Developed completion KPIs (active vs. completed vs. on-hold projects, average delay against planned dates) for real-time schedule-risk visibility.
- Built cost-management logic combining estimated, buy-in and actual hours by resource for cost analysis and workload planning.
- Refined interactive filtering (by resource, user and role) and fixed web-vs-model data inconsistencies to improve report accuracy.
- Partnered with client stakeholders in iterative reviews, turning requirements into reporting improvements (on-time calcs, schedule indicators, drill-down views).

Power BI Engineer

Oct 2021 — Dec 2024 · Remote

Megsoft Consulting / *BI consultancy for the US automotive sector*

- Implemented **Power BI Embedded** in corporate web apps for **Lexus, BMW and Mazda** clients, with granular access control and RLS.
- Optimized models with DAX and M, **-50% query time** on production dashboards.
- Designed automated ingestion processes into the Data Warehouse using **T-SQL Jobs**.
- Led **Git** adoption for Power BI version control and set up deployment pipelines separating dev/prod.
- Built tailored dashboards to each dealership's requirements, with granular permissions.

■ EXPERIENCE (CONTINUED)

Corporate IT Director · Data Analyst

Jul 2017 – Oct 2021 · Santo Domingo, DR

Hodelpa Hotels / hotel chain, 10 properties

- Deployed Power BI as the main real-time KPI tool, giving the CEO 360° visibility into occupancy across 10 properties.
- 10× faster operational cost analysis — from hours to minutes for the commercial teams.
- Improved commercial decisions through rate and occupancy analysis.
- Automated KPI delivery via WhatsApp and Telegram with Power Automate, eliminating daily manual reports.
- Replaced paid surveys with MS Forms + Power Automate + Azure: ≈ -\$1,000 / yr .
- Redesigned the COVID-19 check-in flow with digital pre-registration, reducing front-desk contact.
- Led the corporate adoption of Office 365 and built internal solutions (assets, POS, accounting) with no additional licensing.

IT Manager

Jul 2015 – Jul 2017 · Puerto Plata, DR

Go Caribic / inbound tour operator

- Kicked off the Power BI implementation for the tour operator's operational analysis.
- Restructured the corporate network and connected branches with site-to-site VPN: ≈ -\$2,000 / yr on dedicated links.
- Migrated telephony to VoIP reducing call costs, and enabled secure remote work via client VPN.
- Implemented IT security policies and a cross-branch backup system.
- Negotiated with internet providers, reducing recurring costs.

Independent consulting

2021 – 2022

GMT LLC · South American Restaurants Corp.

- ▶ GMT LLC refrigerated goods distribution · Oct 2021 – Nov 2022
 - Built real-time dashboards and reports for multiple business areas.
 - Performed data cleaning and transformation with SQL Server to support decision-making.
- ▶ South American Restaurants Corporation Jul 2022 – Ago 2022
 - Delivered a virtual intermediate-advanced Power BI course to the internal team.
 - Taught data connection, report building and interactive dashboards, strengthening the strategic use of BI.

■ EDUCATION

M.Sc. in Information Auditing & Security

UASD · In progress (thesis)

B.Sc. in Computer Engineering

UTESA · 2016

■ PROJECTS & PUBLICATIONS

Author — Power BI Book **PACKT**

May 2024

A guide for BI professionals on career, portfolio and advanced practices.

- Strategies for networking, portfolio and certifications
- Core BI competencies: design, SQL, Python, Power BI
- Advanced DAX concepts
- Visualization and dashboard best practices
- Content distribution and security (RLS)

YouTube Channel

Since Apr 2019 · technical content in Spanish

Hands-on Power BI, DAX and Microsoft Fabric tutorials for the Spanish-speaking community of BI analysts and developers.
